

June 2010

“Since January 2008 we have had semen collected from six of our Ayrshire Bulls at Foundation Genetics Service Inc. The staff have always been very helpful in coordinating health tests, arrival dates and transportation. Our bulls have returned to the farm in excellent condition. The staff have been helpful in shipping semen to several countries. The semen quality is excellent. During a herd visit to Braebank Ayrshires, Doug Whyte showed me his Blackaddar George calves – 10 heifers and 7 bulls from 20 doses of semen – all live and no twins.”

Larry Ness, Terrace Bank Farms
